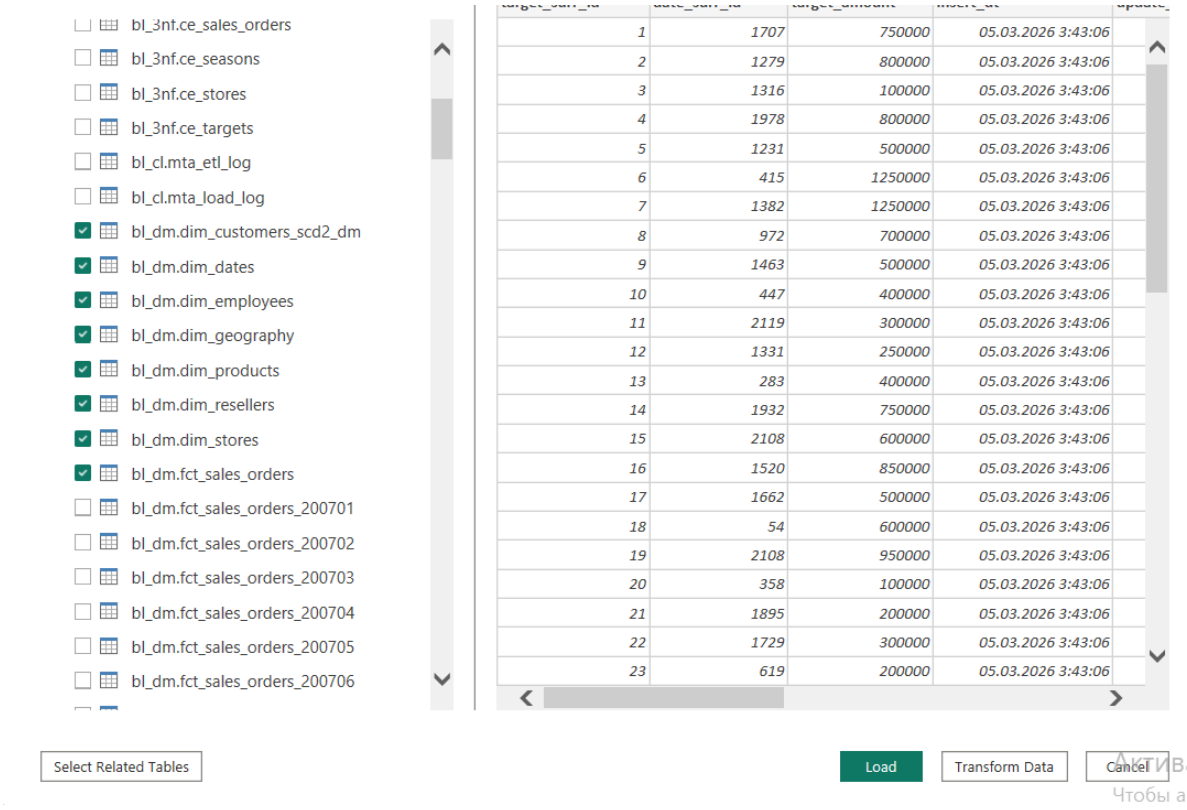
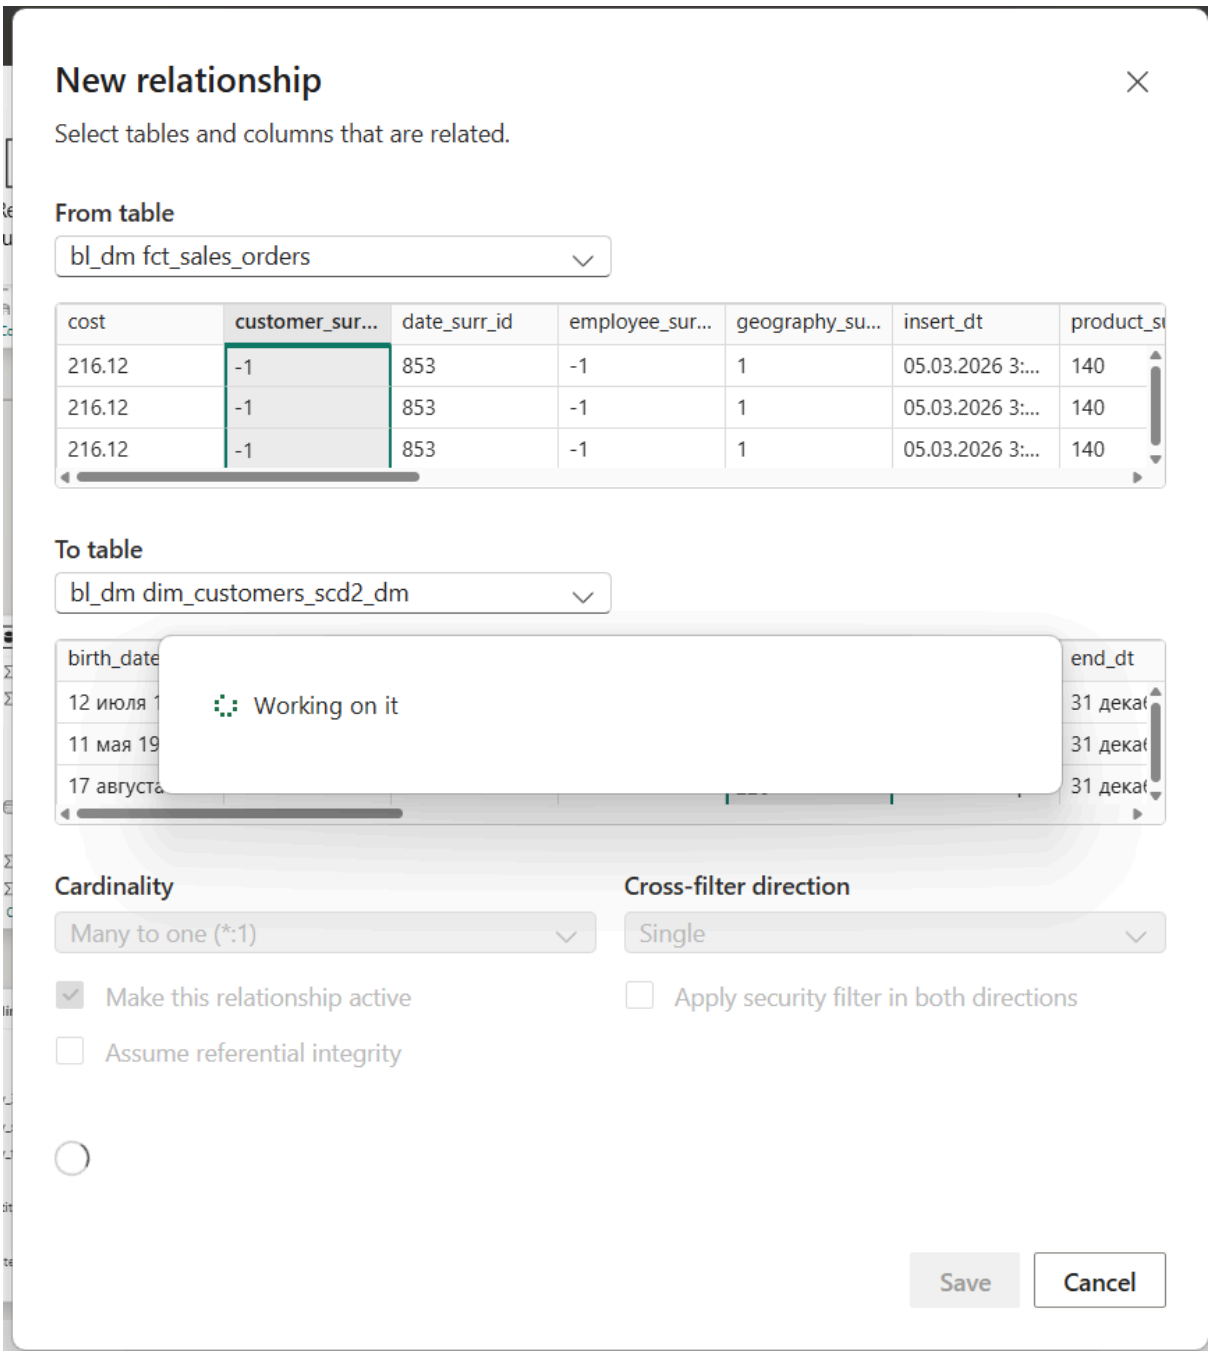
Power BI Final Project
Yerassyl Kudaibergenov

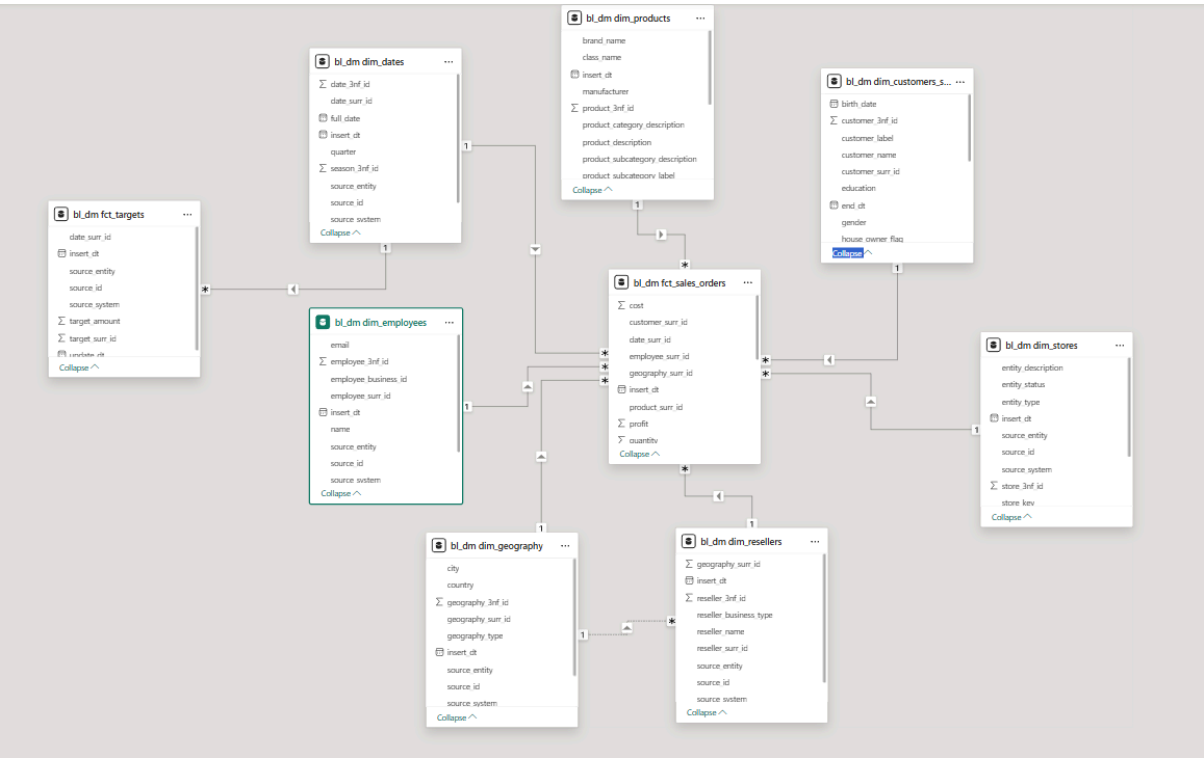
1. Connected to postgresql and chose the BL_DM model to the power BI



2. There were nothing to clean and transform in the power query editor, so I loaded the data to the power bi.
3. Creating the missing relationships



4. The model schema in modeling view



5. Created new measures of overall sales, costs and profits

```
Total Sales = SUM('bl_dm fct_sales_orders'[sales_amount])
```

```
Total Cost = SUM('bl_dm fct_sales_orders'[cost])
```

```
Profit = SUM('bl_dm fct_sales_orders'[profit])
```

```
Profit Margin = DIVIDE([Profit], [Total Sales])
```

6. Created calculated columns for dim_dates

```
Year = YEAR('bl_dm dim_dates'[full_date])

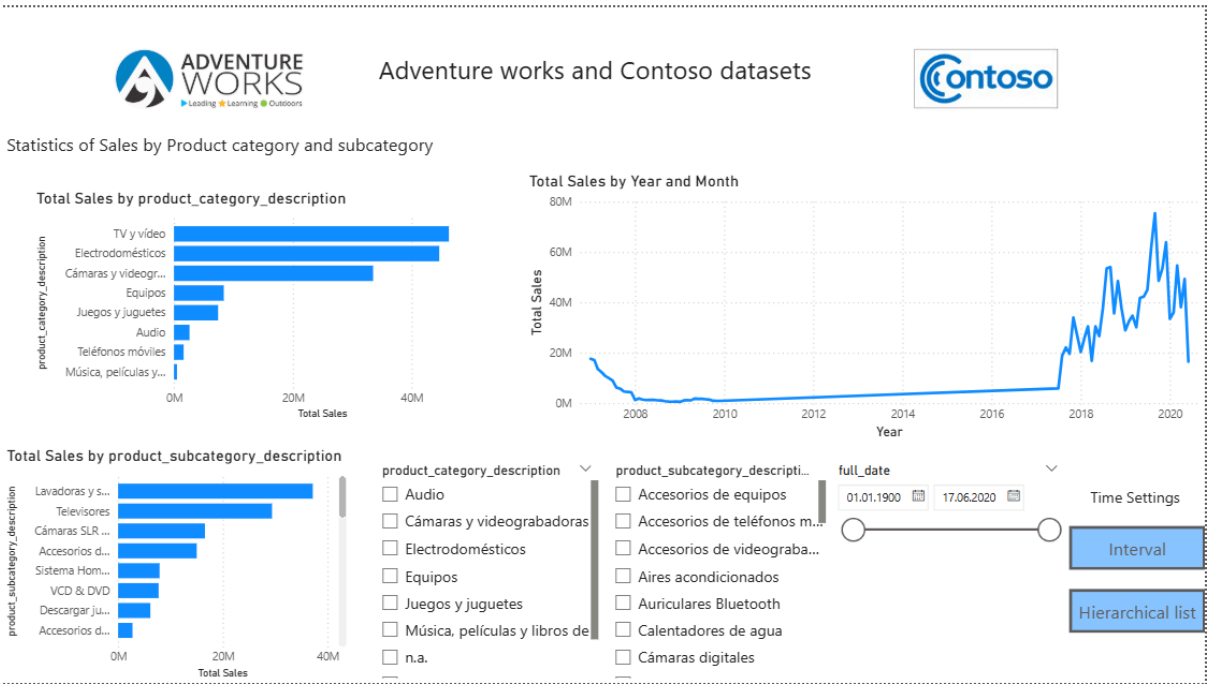
Month = FORMAT('bl_dm dim_dates'[full_date], "MMM"

Month Number = MONTH('bl_dm dim_dates'[full_date])
```

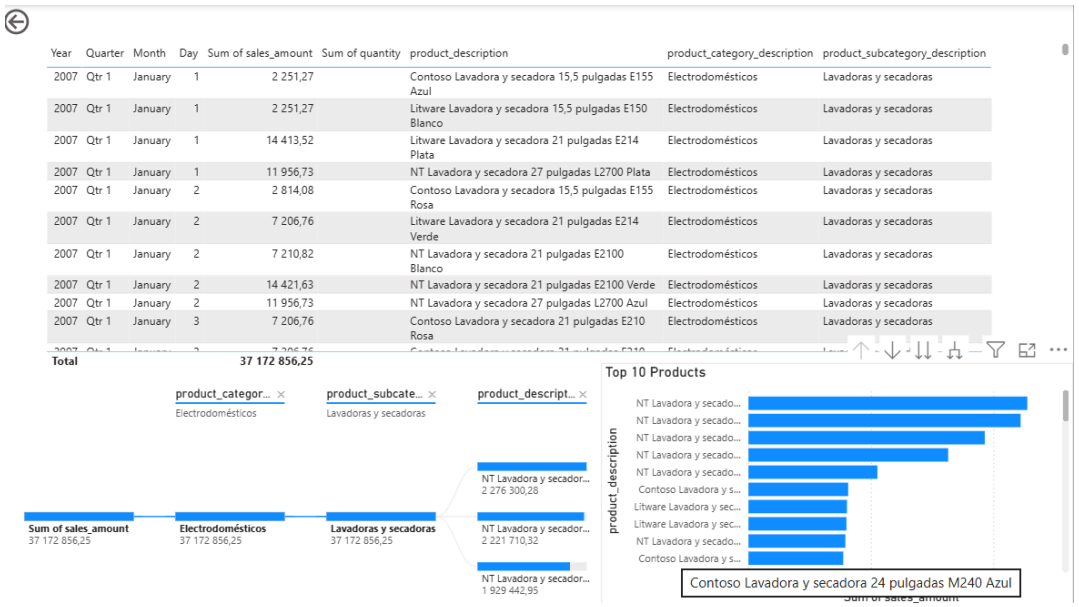
Month Number column is used to sort months chronologically instead of alphabetically.

7. The first page is about statistics and visualization of total sales by product category and subcategory. It is needed for users to see which categories are mostly sold and their sales changes over time. The users can adjust which categories and subcategories

they want to see and choose the period of time to see the changes. Users also can change the time settings setting on interval or hierarchical list. This is done using buttons, selections and bookmarks

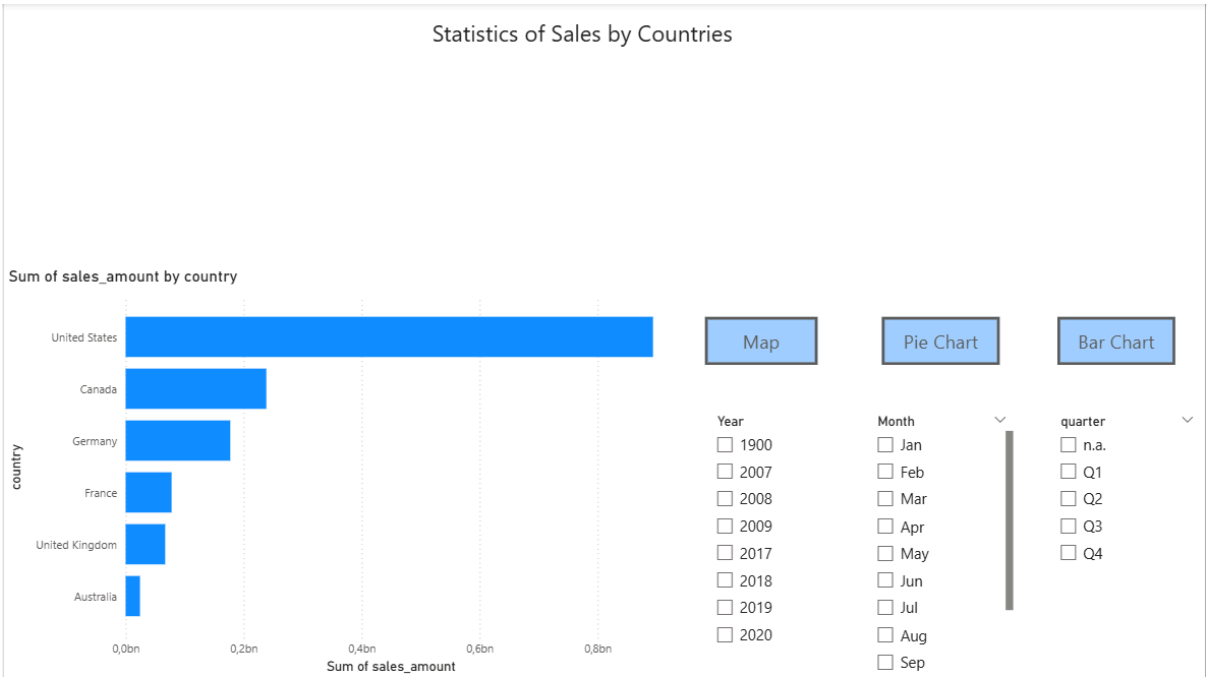


8. Added a drillthrough page to the first page navigation is done through choosing category and subcategory. Users can navigate to it by choosing the appropriate category or subcategory and by right-click, choose the drillthrough. It contains transaction data for the specific category or subcategory and decomposition tree to see the sales using hierarchical tree basis, and it shows the top 10 products in this specific category or subcategory.

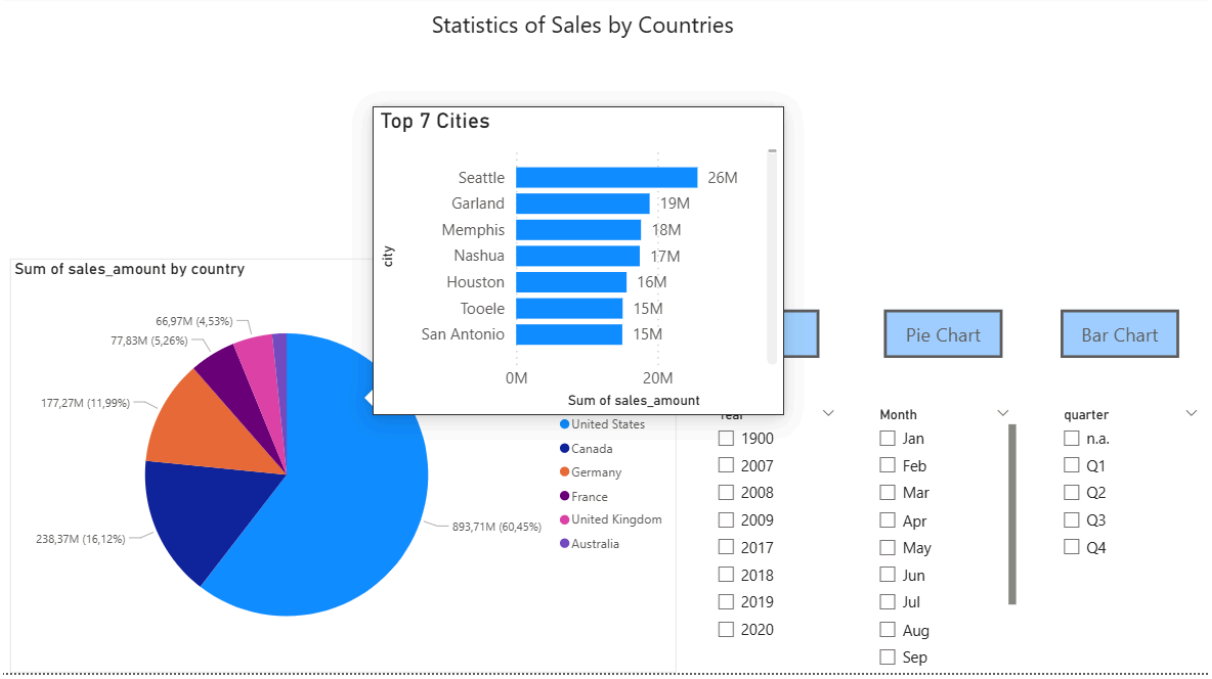


Year	Quarter	Month	Day	Sum of sales_amount	Sum of quantity	product_description	product_category_description	product_subcategory_description
2007	Qtr 1	January	1	2 251,27		Contoso Lavadora y secadora 15,5 pulgadas E155 Azul	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	1	2 251,27		Litware Lavadora y secadora 15,5 pulgadas E150 Blanco	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	1	14 413,52		Litware Lavadora y secadora 21 pulgadas E214 Plata	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	1	11 956,73		NT Lavadora y secadora 27 pulgadas L2700 Plata	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	2	2 814,08		Contoso Lavadora y secadora 15,5 pulgadas E155 Rosa	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	2	7 206,76		Litware Lavadora y secadora 21 pulgadas E214 Verde	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	2	7 210,82		NT Lavadora y secadora 21 pulgadas E2100 Blanco	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	2	14 421,63		NT Lavadora y secadora 21 pulgadas E2100 Verde	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	2	11 956,73		NT Lavadora y secadora 27 pulgadas L2700 Azul	Electrodomésticos	Lavadoras y secadoras
2007	Qtr 1	January	3	7 206,76		Contoso Lavadora y secadora 21 pulgadas E210 Rosa	Electrodomésticos	Lavadoras y secadoras
Total				37 172 856,25				

9. The second page contains information about sales by countries. Users can choose the visual of the page by clicking to either map, bar chart or pie chart, it displays a corresponding visual. Users can filter the year, month and quarter using slicers of lists provided.

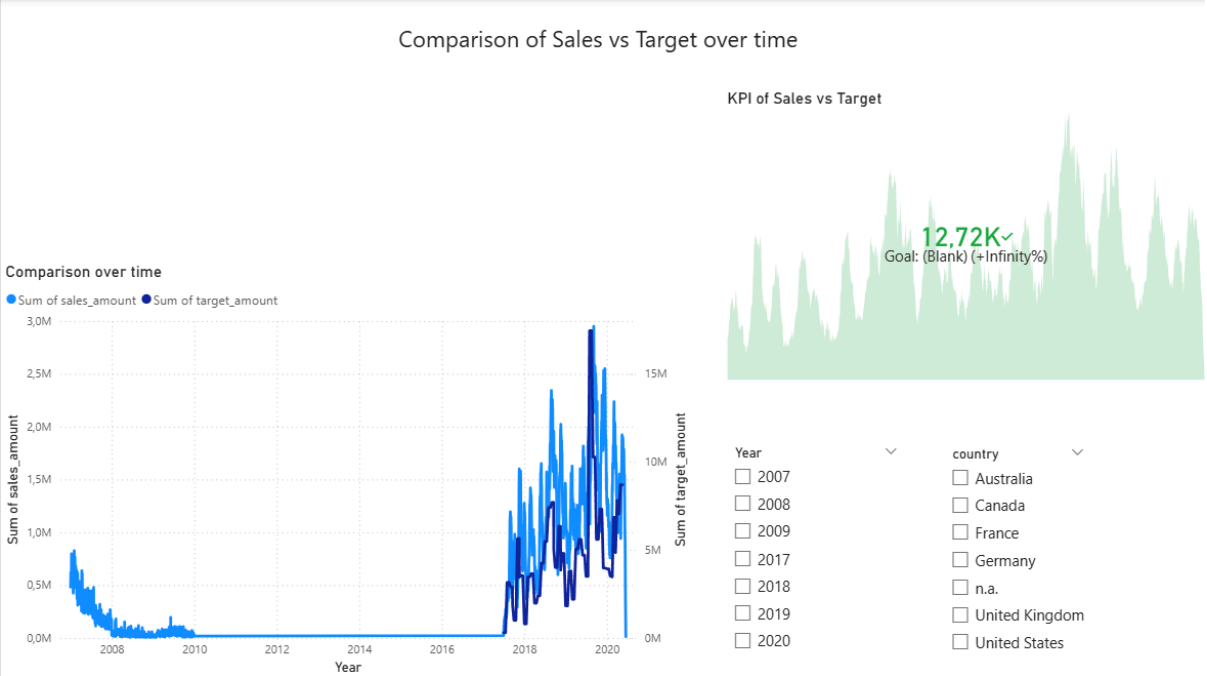


10. If the users move their mouse to the specific country there will be top 7 cities by sales displayed like shown below for all visuals. This is done using the tooltip.



11. The third page is dedicated to the comparison of Sales vs Target. In this page the line chart and kpi chart are illustrated to

show how the sales differ to the company's expected targets. Unfortunately, the target is only dependent on date, therefore slicing by country will not change the target's data. This means we compare the data of a certain country's data to the target of overall countries if we filter by country. This is needed for business to know that their company meets their expectations and goals.



This is it for the Power BI report for my Data Warehouse. Thank you for your attention.

The report is published to Power BI Service, it is located in My Workspace
